Percy (as he was universally known) was an institution in Paediatric Surgery in New Zealand and the South Pacific. He was the first full time Paediatric Surgeon in New Zealand and established Paediatric Surgery as a specialty here.

When Percy arrived in Auckland he recognised that children with complex needs were looked after by adult specialists. He did not recognise such boundaries and set about ensuring that all children were looked after by paediatric specialists. He was determined to provide a proper paediatric patient centred service. His reputation as a clinician and a surgeon grew and he began to attract children from throughout New Zealand and then from the South Pacific.

Percy had a gregarious personality and a philosophy that encouraged cooperation and respect in the treatment of patients, and so was able to maintain strong relationships with clinicians from around New Zealand and with the parents of patients as well.

This is why the symposium held in Percy’s memory includes everyone, paediatricians, paediatric surgeons, trainees of paediatric medicine and surgery, nurses, radiographers, radiologists to name the few. The topics are wide ranging and of interest everyone.

This symposium is held on first Friday of September every year. This is our third such symposium. We sincerely wish good attendance and participation to continue this very memorable occasion and event.

Everyone dealing with children’s health is welcome to attend this symposium. Due to the logistics of booking a room for this symposium, we have organized it for 60 delegates. The bookings will be on first come first serve basis. Please register as soon as you can to secure your place.

We invite everyone to come and celebrate Percy’s memories by meeting people, enjoying the scientific sessions and having fun.
